

Uhm, yes. What makes you think there is life on Mars?

Good question.

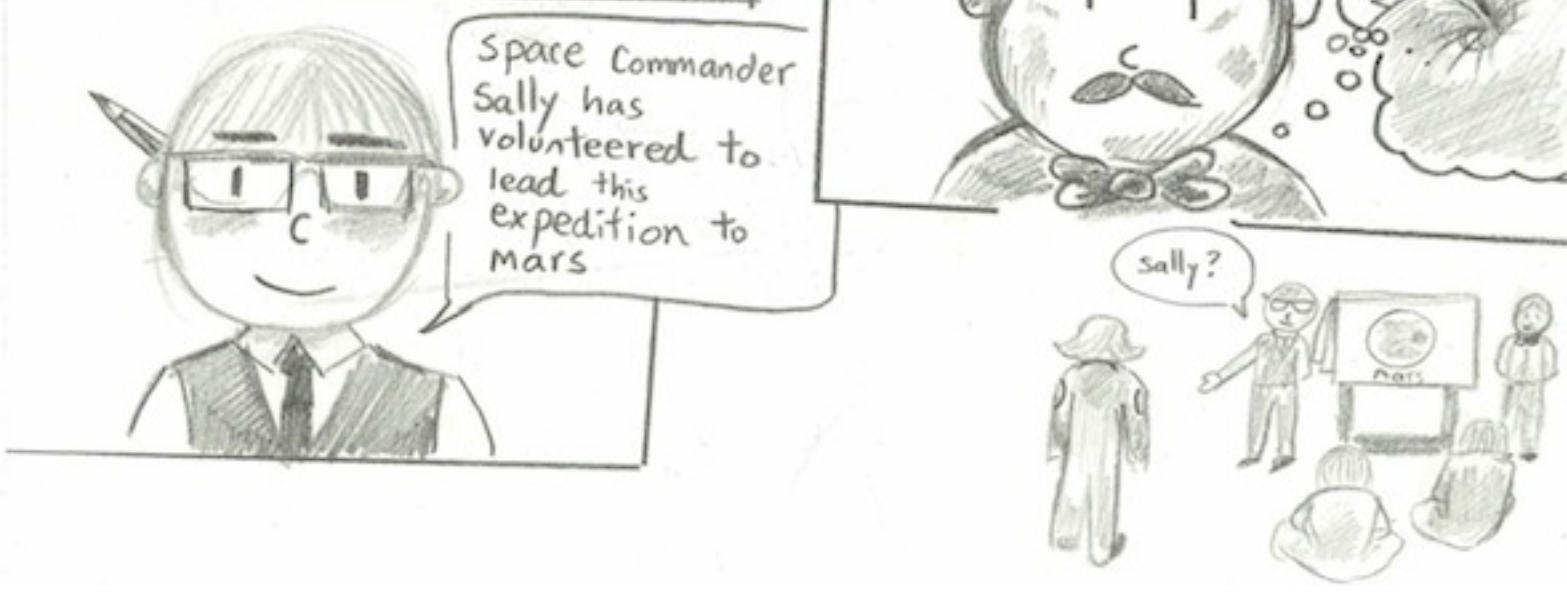

some years ago we received a radio signal from a place near Olympus Mons.

We think it was transmitted by Aliens so we sent space commander Aileen and science officer Eric to investigate.

I see... so what happened to them?

We're not sure... we believe their spaceship crashed on Mars... we received a faint call for help. we think... we hope they're still alive.

Space Commander Sally has volunteered to lead this expedition to Mars

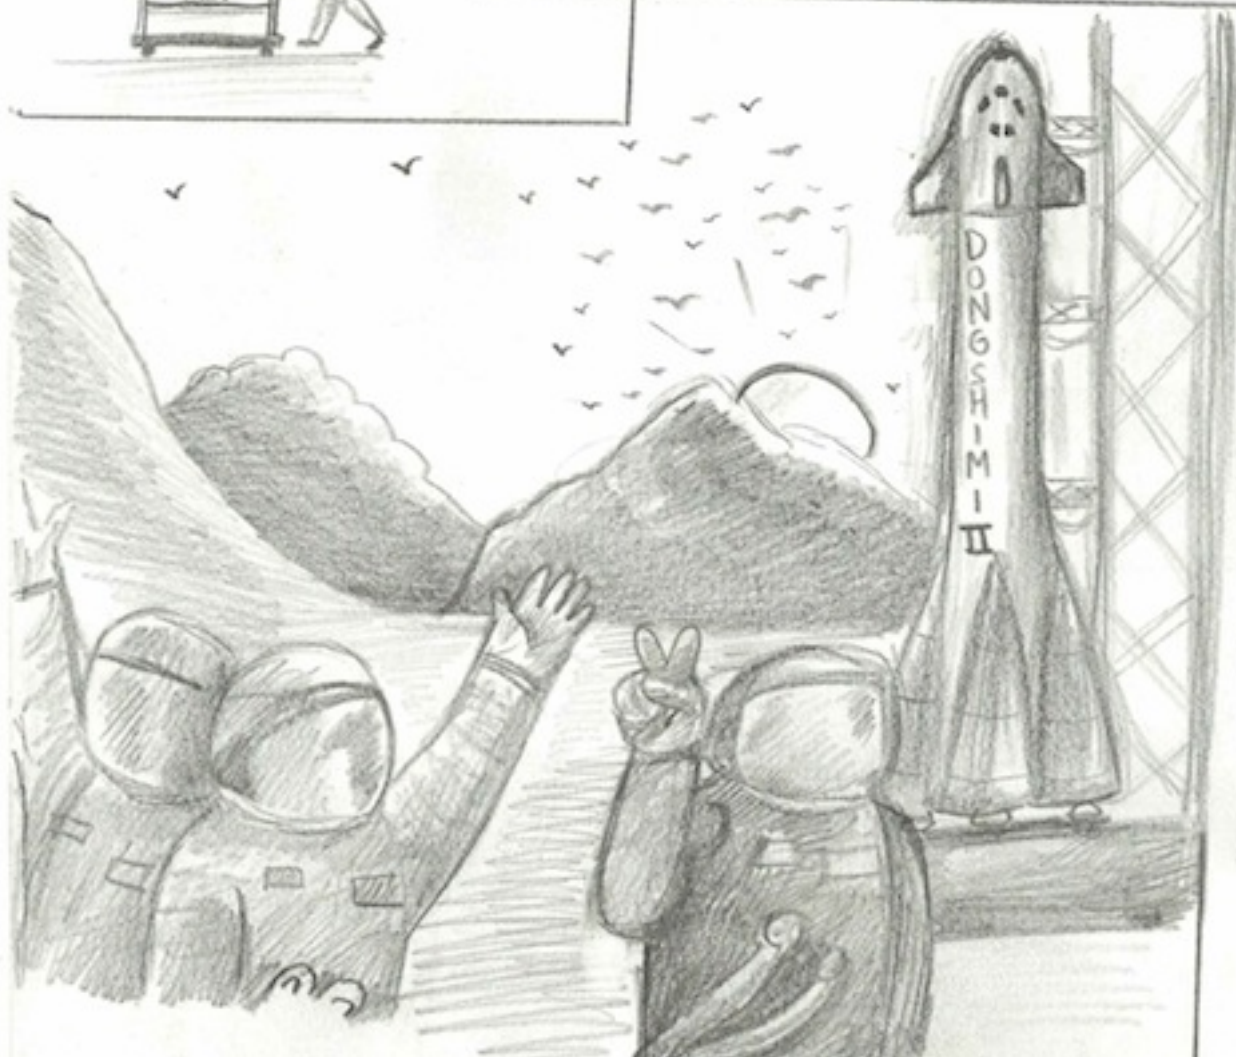

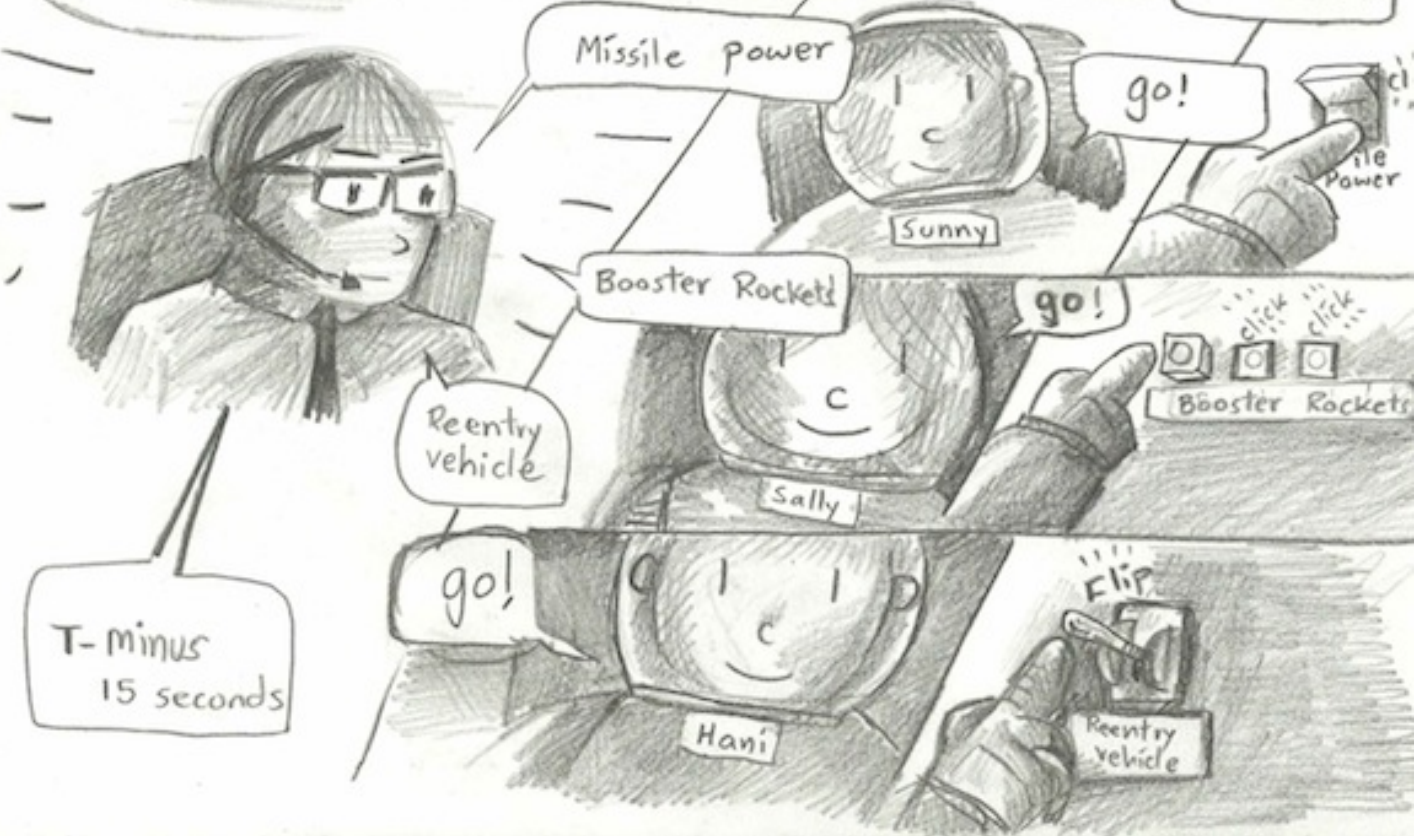

sally?
